

Guide to install the mod I.A.A.M for Anno 1404 or Venice.

For a successful installation you need:

The main game + patch 1.03

or

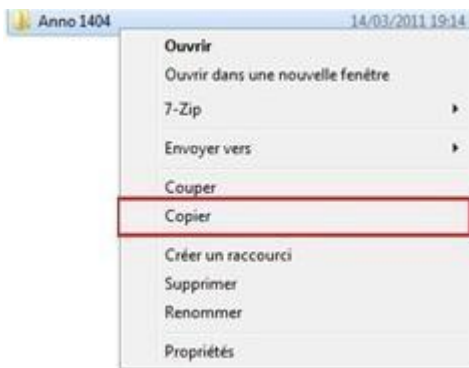

The main game+ patch 1.03+ add-on Venice + patch 2.1

or

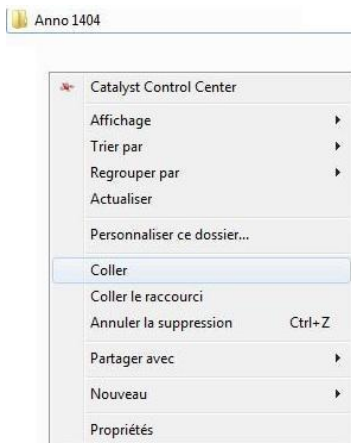

Kings-Edition+ patch 3.01

Step 1 - Copy of the Anno installation.

Right click on the folder, copy.

Right-click on a free surface, then paste.

If you have any new window who say if you are sure,.... say ok/continue.

After that, rename the copied folder "ANNO 1404 - Copy" on "ANNO 1404 - Original" for example. In order to rename the folder right click on it, then "rename":

Step 2 - I.A.A.M. 1404 Install.

Download I.A.A.M. 1404 and extract the rar-file.(If not already done). In it there is the installation-exe and this guide.

Follow the instruction in the screen.

Step 3 - Finished!

Now on the "Related Designs" you should have 2 subfolders:

- " Anno 1404 Original", if you name it like that, with it you can launch (as the name indicate) the original Anno without the mod.
- "Anno 1404", who corresponded to Anno with the mod.

Tip: Don't forgot to do some shortcut to have a fast access to the mod and the original game.

Any questions/suggestions? go here: www.ProjectAnno.de

Much fun wish to you S.D. and the IAAM-Team.
